

New Features in KB from 1st Jan 2023

1. At the initial stages of launching of KB system, MoRD had suggested to implement the CRM module in the year 2021 to address the legacy batch related issues. In order to streamline the system as per the SoP, from 1st Jan 2023 the following sub modules will be disabled under the CRM Module.
 - i. Batch Start Date Reset
 - ii. Candidate Enrolment
 - iii. Candidate De Enrolment

2. Batch Start Date
 - a. In the current system, the batch start date has been the current date. However from 1st Jan 2023, PIA can create a batch in KB on or before the batch freezing date (Calendar will be available for those days)
 - b. PIA can submit the batch to the SRLM for approval, prior to the freezing date. The same will be available in the SRLM OP login for approval.
 - c. Until batch is approved by the SRLM OP, PIA will not be able to update the training management sub modules for the particular batch like Welcome kit, External Assessment request, Candidate dropout, etc.,
 - d. In Candidate Enrolment, a “save as draft button” is available. PIA Op can submit the batch for the approval or they can use the “save as draft button”. After the freezing date (11th Day from Batch Start Date) based on the available data, the batch will be automatically submitted for the SRLM approval.

Note: Further, if the batch is created on the freezing day, please ensure that all the candidates are properly enrolled in the batch. No modification is allowed once the batch is submitted for approval.
